## ENVIRONMENTAL ASPECT

Park Hyatt Maldives Hadahaa has collaborated with Green Globe and EarthCheck to monitor our performance in accordance with a stringent internationally recognised approach. We strive to surpass Best Practice benchmarking levels and continually improve upon the existing environmental and social sustainability performance within the confines and parameters of a remote location such as ours. As the first resort in the Maldives to commit to the EarthCheck principles throughout the design, construction and operational stages our commitment has been unwavering. It was this commitment that allowed us to achieve the prestigious EarthCheck ‘Building Planning and Design standard’ certified status in August 2008. To ensure we monitor our efforts and continuously improve, we have our Resident Marine Biologist as the Green Globe Coordinator, who is responsible for identifying environmental risks, recording and monitoring our performance through benchmarking, whilst driving the environmental and social initiatives undertaken by the resort. To date, the resort is certified Gold by Green Globe.
