For the same reasons restrictions regarding the participation of children may apply. Please wear a cap and comfy clothing, closed toe shoes and bring sun cream and insect repellent with you. For health and safety reasons, we strongly recommend you not to engage on any of the hikes described above without a professional guide. Hiking on your own in the national park is not forbidden and by doing it you are fully accountable for your own safety.

Activities and schedule may be altered without notice due to weather, trail and sea condition. For bookings and to know more about our activities, kindly approach any of the activity coordinator at the activity centre or call extension 730.

## ACTIVITIES EXCURSIONS

### HIKE TO ANSE MONDON

This beautiful hike through the National Park will take you around Silhouette's north western part to Anse Mondon, a small, secluded cove in the north of the island. You will pass a view point, aptly named 'Belle Vue', with stunning panoramic views of Silhouette's sea-scape. Upon arrival you will have the chance to cool off on the beach or swim and snorkel in the crystal-blue sea.

The maximum elevation is approximately 260 m. The notorious and intrepid pirate Jean-François Hodoul ventured into the pristine wilderness of the island before settling on Mahé. ### HIKE TO JARDIN MARRON

This very interesting trail was initially trodden by slaves fleeing La Passe village in the nineteenth century. It involves a fairly strenuous uphill hike up to around 450 m altitude and will take you into the centre of the island and to the only location where Silhouette's own collection of Coco de Mer trees can be seen. Along the way, numerous endemic plants, birds, insects and reptiles can be spotted, including the giant millipede, Seychelles Bulbul and skink (lizard). After spending some time to take photos, relax and look for lush fauna, it typically takes around one hour to descend back to La Passe village.

### SILHOUETTE NATIVE PLANT TRAIL

Discover the flora and fauna of Silhouette Island.

The trail winds through a mixed natural ecosystem and botanical garden. Its a work-in-progress. Invasive exotic plants like Cinnamon are regularly removed so that native plants can re-colonize the area.

All labelled plant specimens are either indigenous (occurring naturally both in Seychelles and in other parts of the world) or endemic (found only in Seychelles)

Labels indicate their Creole and scientific names. Endemics are indicated by a Seychelles flag.

The forest restoration is expected to benefit native fauna including land birds, reptiles, invertebrates, and the Critically Endangered Seychelles Sheath-tailed Bat. The trail allows visitors to view a wide variety of native plants within the vicinity of La Passe.
